## 4. First-aid measures

### Eye contact

Check for and remove contact lenses. Flush immediately with copious amounts of water or normal saline (minimum of 15 minutes), holding eyelids apart to ensure complete irrigation of the eye and eyelid tissue. Take exposed individual to a health care professional, preferably an ophthalmologist, for further evaluation.

### Skin contact

Remove contaminated clothing, shoes and equipment. Immediately flush skin with plenty of water. Repeat washing. If redness or irritation occurs, seek medical attention. Wash contaminated clothing before reuse.

### Inhalation

Move person to fresh air and loosen clothing. If the affected person is not breathing, apply artificial respiration. Get medical attention immediately.

### Ingestion

Rinse mouth thoroughly. Drink 1 or 2 glasses of water. Do not induce vomiting without advice from poison control center. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. Get medical attention.

### Most important symptoms/effects, acute and delayed

Irritant effects. Discomfort in the chest. Shortness of breath. Coughing. Symptoms include itching, burning, redness, and tearing of eyes. Prolonged or repeated skin contact may cause drying, cracking, or irritation. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. Inhalation of vapor or mists may cause lung edema.

### Indication of immediate medical attention and special treatment needed

Treat symptomatically.

### General information

Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).

## 5. Fire-fighting measures

### Suitable extinguishing media

Water fog. Water spray. Carbon dioxide (CO<sub>2</sub>). Foam.

### Unsuitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire.

**Specific hazards arising from the chemical**

Heating may cause the release of ammonia vapors.

**Special protective equipment and precautions for firefighters**

Self-contained breathing apparatus and full protective clothing should be worn when fighting chemical fires. Selection of respiratory protection for firefighting follow the general fire precautions indicated in the workplace.

**Fire-fighting equipment/instructions**

Use standard firefighting procedures and consider the hazards of other involved materials. Move containers from the fire area if you can do so without risk.

**Specific methods**

Use water spray to cool unopened containers.

## 6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

Avoid inhalation of vapors and spray mist and contact with skin and eyes.  
Wear suitable protective clothing. For personal protection see Section 8 of the SDS.

**Methods and materials for containment and cleaning up**

Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb with vermiculite, dry sand or earth and place into containers. After removal flush contaminated area thoroughly with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original containers for re-use.

**Environmental precautions**

Prevent further leakage or spillage if safe to do so. Do not contaminate water. Do not allow to enter drains, sewers or watercourses.

## 7. Handling and storage

**Precautions for safe handling**

Avoid inhalation of vapors/spray and contact with skin and eyes. Use only with adequate ventilation. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities**

Store in a cool, dry well-ventilated place. Keep container tightly closed. Keep this material away from food, drink and animal feed. Avoid using containers, pipes and fittings made of zinc-clad or copper bearing alloys. Use care in handling/storage.

## 8. Exposure controls/personal protection

**OSHA Exposure Guidelines:**

<u>Component</u>	<u>Limits</u>
------------------	---------------

No components found.

**ACGIH Exposure Guidelines:**

<u>Component</u>	<u>Limits</u>
------------------	---------------

No components found.

**Biological limit values**

No biological exposure limits noted for the ingredient(s).

**Exposure guidelines**

Follow standard monitoring procedures.

**Appropriate engineering controls**

Provide adequate general and local exhaust ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of vapors and mists. Provide eyewash station and safety shower.

**Individual protection measures such as personal protective equipment****Eye/face protection**

Wear approved safety glasses or goggles.

**Skin Protection****Hand protection**

Neoprene gloves are recommended. Be aware that the liquid may penetrate the gloves. Frequent change is advisable. Suitable gloves can be recommended by the glove supplier.

**Other**

Wear appropriate clothing to prevent repeated or prolonged skin contact.

**Respiratory protection**

If engineering controls do not maintain airborne concentrations below recommended exposure limits (where applicable) or to an acceptable level (in countries where exposure limits have not been established), an approved respirator must be worn. Wear air supplied respiratory protection if exposure concentrations are unknown. In case of inadequate ventilation or risk of inhalation of mist, use suitable respiratory equipment with particle filter.

In the United States of America, if respirators are used, a program should be instituted to assure compliance with OSHA 29 CFR 1910.134 and ANSI Z88.2.

**Thermal hazards**

Wear appropriate thermal protective clothing, when necessary.

**General hygiene consideration**

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Handle in accordance with good industrial hygiene and safety practice.
